"Santa FE County."—It appears that the President, upon the call of the Senate, has just favored that body with a statement of the number of troops sent to Mexico, with the number of tilled and wonnded, as well asthose who have died of disease. Perhaps his Excellency has added, or, if asked, will add, a terrher statement of the expense of these troops, the pay, transportation and subsistence, land bounty, &c.; and, in addition, some reasonable estimates of the farther expense which must arise from the new pension list.

These documents having been furnished, we would suggest to any public-spirited Senator, who happens to be a good arithmetician, the propriety of calculating, from such authentic data, the expense, to live and money, which the United States have been put to, in effecting the conquest of New-Mexico. Such a calculation will be of peculiar interest—because the State of Texas, having laid claim to this conquest, or to all of it situated east of the Bio Grande, comprising four-fifths or more of the whole territory—having actually, by recent enactments of her Legislature, annexed it as a portion of her dominions—organized it into the new "County of Santa Fs." and directed the enrolment of its people as a portion of her militia—the people of the United States may be supposed to feel some anxiety to know how much it has cost them to acquire this territory for Texas. We rather think they did not know they were acquiring it for Texas. [Philad, N. Amer.]

There are a great number of charitable Institutions, probably more than in any other city in the Union; and I am told that they are so conducted as to be worthy of the name; and it is well that it is so, for they are all needed.

No one should visit New-Orleans without seeing the Cemeteries; one turns back again upon the town better reconciled to it, for, after observing the population of the "Cities of the dead," he cannot hope to remain in it long.
